

Produces **machines and complete bottling plants for oil, wine, spirits, water and for food industry** in general and in particular filter, rinsing and blowing machine, filling machine, capping machine, labelling machine and final packaging equipment in order to satisfy any particular manufacturing requirement and in order to **work any kind of bottles**.

Thanks to a twenty-year-old experience, the company deals with the **production of machineries for wine, oil and food-stuff industry**, starting from the production of separate machines up to the realization of complete filling lines.

In particular, it **plans and produces, rinsing, filling, capping, labelling, filtering and packing system** for little, middle and large

production.

All the machinery is produced according to EC laws and accident prevention equipment is included. We can meet every production requirement and deal with every kind of bottle.

Semiautomatic filling machines “ST”

The filling machine “ST” are made in stainless steel AISI 304 and they are suitable for filling oil, wine and liquors in glass bottles of 0,250 up to 2 Litres or of 5 Litres. Complete with pump. The filling came automatically by inserting the bottles into the filling nozzles, with automatic stop as the liquid arrives at prearranged level. Model with 4 and 6 nozzles.

Weighing-Machines for Cans “RPLE”

<http://www.bemeco.it/>

Semi-automatic weighing machines suitable for filling Oil or dense liquids into Cans or any other plastic container. Machines with platform scales, clock head and sustaining plane with stainless steel drip. Complete with electronic Scale with digital display. Collecting gutter. Feeding pump with electric control for the automatic stop at the prearranged weight. On 4 wheels to make its moving simpler. Primary execution of the machines in stainless steel AISI 304.

Screwers “VS/94”

Suitable for closing bottles with aluminium screw caps, the machines model “VS/94” are made in stainless steel AISI 304. Machine specially versatile suitable for small and medium output. It is wheels mounted, the head unit with 4 rollers works downwards, automatic start microswitch. Complete with accident prevention in compliance with EC directions.

Rinsing/Blowing machines “Easy”

The machines “Easy” are suitable for polishing the inside of the glass bottles with prefiltered air and/or water.
Execution in stainless steel AISI 304.
